Rewrite the sentence below, adding a relative clause.

The mosquito sucked blood through its needle-like proboscis.

Example: The mosquito, which landed silently on the boy's arm, sucked blood through its needle-like proboscis.

Did You Know?

In some parts of the world, the mosquito is responsible for transmitting diseases like malaria, dengue and Zika. Its bite can introduce pathogens into the human bloodstream, leading to severe illness and even death. This makes it one of the most dangerous creatures on the planet.

Number Challenge

- A mosquito's mouthpart contains 6 needle-like structures called stylets.

If 6 is the answer, what was the question? Can you think of a question that no one else will have thought of?

Critical Thinking

Should mosquitoes be eliminated (wiped out) by humans? Why do you think this?
