Rewrite the sentence below, using the passive voice.

The blackbird incubated her speckled eggs in a warm, mossy nest.

Did You Know?

Spring brings warmer weather, which encourages animals to wake up from hibernation. Birds gather materials to construct their nests and lay eggs, while mammals emerge to forage for food. It's a vibrant time of growth and birth for many creatures as food becomes plentiful again. Plants begin to awaken from dormancy, sprouting new leaves, flowers and buds as they absorb sunlight and nutrients from the soil.

Number Challenge

In the spring, a blue tit laid a total of 15 eggs.

If 20% of these eggs failed to hatch, how many eggs successfully hatched?

Critical Thinking

“No matter how long the winter, spring is sure to follow.”
