Rewrite the sentence below, adding an additional comma. How does this change the meaning of the sentence?

After they left the virtual titanosaur, the presenter and his crew walked home.

Did You Know?

Titanosaurs were the biggest land animals Earth has ever seen. Living during the Cretaceous period, it is thought that a titanosaur's heart probably weighed as much as three men. It has been calculated that a titanosaur's heart needed to pump around ninety litres of blood with each beat. Unlike a human heart, the titanosaur's heart would have had four chambers instead of two.
