Copy and complete the sentence below with some awesome adjectives.

The _____ predator, with _____ teeth, captured the _____ capybara in the _____ water.

Did You Know?

The Amazon rainforest's top predator is the magnificent jaguar. This stealthy hunter relies on ambush tactics, using its powerful jaws to deliver a fatal bite. Jaguars are solitary and territorial, often prowling along riverbanks and dense jungle paths in search of prey.

Number Challenge

A jaguar leapt a horizontal distance that was 4.5 times its body length.

If the jaguar's body length was 1.76 metres, how far did it leap?

Critical Thinking

Jaguars spend a large portion of their daily lives napping whilst draped across a branch of a tree.

What do you think jaguars dream about?
