

Morning Starters: Spring 1 - Sight & Sound

Word Challenge

Compound words are created when two or more words combine to form a new single word.

Example: rain + bow = rainbow

Make a list of the compound words that appear on this page.

Grammar Challenge

Click text to edit 

Write a sentence about a dragonfly that uses alliteration.

Example: The dragonfly's delicate wings dazzled in the dappled daylight.

Clip Description

The multi-coloured dragonfly is an insect species that boasts incredible eyesight. With nearly 360-degree vision and up to 30,000 individual lenses in each eye, it can detect the slightest movements and colours. This aerial predator's exceptional vision makes it a master at hunting in flight above waterbodies such as ponds and lakes.

Number Challenge

- Dragonflies see faster than we do; they see around 200 images per second.

How many images will a dragonfly see in a minute?

How many images will a dragonfly see in an hour?

Critical Thinking

For one day only, would you like to swap your life with the life of a dragonfly? Why? Why not?
